

British Premier's Final Offer For Conference May Be Accepted

Dublin.—The general feeling here is that Mr. Lloyd George's invitation for a conference on October 11 will be accepted. "The whole temper of the Irish people appears to have changed for the better and optimism now prevails here."

The Freeman's Journal cordially welcomes Premier Lloyd George's reply, which, it says, creates a reasonable opportunity for the Irish and British representatives to meet. It declares that the Premier's final paragraph leaves the delegates unfettered and the paper sincerely hopes that the invitation will lead to a conference.

"We are confident," it adds, "and the people of both nations realize that the same confidence, that such a conference will result in a great and beneficial measure of peace."

"(Lloyd George)—The last note from Kannon de Valen, which was despatched to Dublin follows:

"Sir: His Majesty's Government have given close and earnest consideration to correspondence we have passed between us since our invitation to you to send delegates to a conference at Innsbruck."

"In spite of their sincere desire for peace, and in spite of the more conciliatory tone of your latest communications they cannot enter into a conference upon the basis of this correspondence."

"Notwithstanding your personal assurance to the contrary, which they much appreciate, it might be argued in the future that the acceptance of a conference on this basis had involved them in a recognition which no British Government can accord. On this point they must guard themselves against any suggestion that there is no purpose to be served by any further interchange of explanatory and argumentative communications upon the subject."

"The position taken up by His Majesty's Government is fundamental to the existence of the British Empire and they cannot alter it."

"My colleagues and I remain, however, keenly desirous to make, in cooperation with your delegates and other determined effort to explore every possibility of a settlement by mutual discussion."

"The proposals which we have already made have been taken by the whole world as proof that our endeavors for reconciliation and settlement are no empty form, and we feel that conference, not correspondence is the most practical and hopeful way to an understanding such as we ardently desire to achieve."

"We, therefore, send you herewith a fresh invitation to a conference in London, on October 11, where we can meet your delegates as the spokesmen of the people which they represent with a view to ascertaining how the association of Ireland with the community of nations known as the British Empire may best be accomplished with Irish national aspirations."

"I am, sir, your faithfully,
D. LLOYD GEORGE."

Consider Securing Help For Russia

Relief Committees Will Not Appeal to League of Nations.

Geneva.—A recommendation that the assembly of the League of Nations appeal to its members for credits to Russia will not be made by the Russian Relief Committee, it was announced here.

The matter of securing funds for Russia and the organization of relief measures were left entirely to the conference to be held in Brussels soon and to welfare organizations. The reason given for this decision by the committee was that various governments have found it impossible to open new credits at this time.

Fear Volcanic Eruption.
Mexico City.—Popocatepetl, the great volcanic mountain southeast of this city, is reported to be in more vigorous activity than usual. The inhabitants of the villages of Amecameca and Tlaxcala at the base of the mountain are leaving their homes, fearing a serious eruption.

Give Aid To Russia.
Rome.—The Holy See has instructed the Bank of Rome to transmit 1,000 Italian lire to the papal nuncio in Bern, Switzerland, for the relief of the Russian famine sufferers.

The Empire's Effort—And Sacrifice

One Man in Every Ten Laid Down Life in Great War.

From a return lately printed for the House of Commons, and published in the official Parliamentary report of May 5, we are now fully able to realize the magnitude of the effort made by the British Empire during the European war and how heavy was the sacrifice demanded of those who helped by land and sea in gaining the victory at the end of the long struggle. The total numbers of our men and land forces that served during the war amounted to the huge total of something over nine millions more than that it exacted from a native India, who, although thoroughly in sympathy with the idealistic side of the National movement in India, has borne the weight of his influence on the side of constitutional reform under the British Government.

Dr. B. D. Butler, a recognized leader of the moderate party in India, who addressed the Canadian club here, said the Indian side was not so much that it exacted from a native India, who, although thoroughly in sympathy with the idealistic side of the National movement in India, has borne the weight of his influence on the side of constitutional reform under the British Government.

The data strenuously emphasized the fact that the race now going on in India between constitutional reform and revolution on the one hand and the other was one that affected the other sections of the Empire merely as spectators. On the one hand, the other sections of the Empire did, said and thought, was of vital consequence.

Japan Selects Delegates

Surprise Caused By Appointment of Prince Tokugawa.

Tokyo.—The Japanese delegates to the Washington Conference on Limitation of armaments will be: Prince Iyeyasu Tokugawa, president of the House of Peers; Vice-Admiral Tominari Kato, Minister of the Navy, and Baron Kiyo Shidzuka, ambassador to the United States. It has been officially announced.

The delegation includes 15 others representing the foreign office, three representing the ministry of finance, and the military and navy, and seven the army.

The appointment of Vice-Admiral Kato and that of Ambassador Shidzuka had been expected, but the Asahi Shimbun in commenting upon the makeup of the delegation, emphasizes the fact that the appointment of Prince Tokugawa was a great surprise to the nation. It expresses the view that for one thing it embodies a move by Premier Hara to prepare the way for a Tokugawa ministry after the Washington Conference, when the present cabinet, it says, is likely to resign.

Australia Has Surplus For Year

Treasurer's Report Shows Economic Strain Is Easing.

London.—A Router cable from Melbourne says the treasurer of the Australian Commonwealth, Sir J. Cook, when introducing the budget in the House of Representatives, showed a surplus for the past year of £594,000. The revenue for the year was £4,435,518,000, which exceeded the estimates by £2,153,000.

The expenditures were £4,432,000, or £3,488,000 less than the estimates. An accumulated surplus of £2,515,000 was reported.

The estimated revenue for the forthcoming year is £4,517,000, and the expenditure £4,640,000, including £2,600,000 for shipbuilding; £1,100,000 for soldiers' homes and land settlement; £4,600,000 war pensions, and £2,600,000 aviation development. The gross public debt is reported as £4,617,200, of which £2,600,000 is due the Imperial Government.

Thos. Edison Says Good Times Coming

New York.—"Good times are coming," says Thomas A. Edison. "The tide already has begun to turn. Times are getting better now, slowly of course but surely."

"Three periods of depression are caused by a faulty adjustment of our economic machine or by it being thrown out of gear by some unusual force such as war. The machine is all right; it will work properly as soon as the obstruction is removed."

Says Germany Must Go To Reparations Limit

Munich.—"We must go to the limit of our capacity with regard to reparations," Dr. Walter Rathenau, the German minister of reconstruction, declared today in the committee of the Imperial Association of German Trades: "Complete fulfillment of the terms of the ultimatum will affect the world economically more severely than ourselves. Britain has three million and the United States six million unemployed. The German people must work the more the others cease work."

What is needed is an international economic understanding. The minister approved Winston Churchill's suggestion of cooperation as outlined in his Danzig speech and said with regard to France: "We must give goods; the problem is to substitute products for cash. We are to have a currency agreement with France regarding arrangements for delivery of gold marks to the amount of seven billion in the course of four and a half years."

Hungary Willing To Obey Instructions

Burgundian Question Is Now Ready Settlement.

Paris.—Hungary has sent a note to the Council of Ambassadors here declaring it is ready and willing to carry out the instructions of the council with regard to Burgundian, the strip of territory along the frontier between Austria and Hungary awarded to the former country by the Trianon Treaty, and has asked the approval of the council for direct negotiations with Austria for a settlement of the question.

The Ambassadors' Council has drafted a reply saying there is no objection to direct negotiations or mediation by a third party if the order of the council for evacuation of Burgundian by Hungary is first observed.

Canada's Sea Fish Catch Decreases

Ottawa.—The total quantity of sea fish landed on both the Atlantic and the Pacific coasts during August, this year was 776,877 cwt., valued at \$3,043,461. During the corresponding period in the preceding year 1,058,881 cwt. were landed with a value of \$3,647,137.

In British Columbia there were 415,302 cwt. of halibut taken during the month. In the same period last year 28,680 cwt. were taken. The salmon taken in British Columbia during August amounted to 224,766 cwt., about half the quantity landed during the same period last year.

Refugees In Petrograd

Riga.—Approximately 150,000 refugees from the famine districts of Russia now are in Petrograd, says a wireless message received here. Work has been found for only 5,000 of these refugees, the wireless adds.

Forbidden To Drive Car

Moore Jay, Sak—Andrew Caser, who was found guilty of driving a motor car in a manner dangerous to the public, was forbidden to operate a car for six months and fined \$25 in the police court here.

C.P.R. Reduces Rates On Livestock Shipments To St. Paul & Chicago

Urges Aiding Austria

Gen. A. J. Balfour Appeals to All Countries For Help.

Geneva.—Speaking in the assembly of the League of Nations on a resolution expressing the regret of the assembly that the reconstruction of Austria's finances had been delayed for a reason it was hoped would shortly be removed, Right Hon. A. J. Balfour said the Allies had done all they could for the restoration of Austria. All of them had released their alien-aid that end, he recalled, and he hoped that the Austrian people would not lose their courage. He appealed to all the countries, in the general interests of Europe and for the credit of civilization to do all they could to enable Austria to regain her feet.

World Record For Altitude

Airman Attained Official Height of 40,600 Feet.

Dayton, Ohio.—Lieut. John A. MacReady, test pilot at McCook Field, shattered the world's altitude record, attaining an official height of 40,600 feet in the same airplane flown by Major Rudolph C. Schroeder, who set a record of 35,150 feet on February 28, 1926.

Lieut. MacReady was in the air one hour and forty-seven minutes, requiring all but a few minutes of the total flying time to reach his mark. At 20,000 feet, he burned out his oxygen tank but he pressed on until the anti-aircraft rocketed 41,000 feet. At this point his engine coughed and died. He then glided safely to the ground.

Sixty-Three Days In Open Rowboat

American Ex-Soldier and Daughters Made Record By Police Launch.

Washington, D.C.—By Chesapeake Bay fishermen five miles off Norfolk, Va., is an open rowboat, in which, they have been cruising the waters of the bay, and the Potomac River for sixty-three days, William A. Spencer, ex-soldier, and his two daughters, Con and Eleanor, were later located by a police launch and brought to that port after a nation-wide search for weeks, following their mysterious disappearance from this city. Finding of the father and daughter was made known to the public through news here after notification from the Norfolk authorities.

Typhoon In Japan Kills Hundreds

Tokyo.—Several hundred persons have been killed by a typhoon in Central Japan, coming upon Nagoya, on the island of Honshu, where a tidal wave destroyed crops and houses. Several steamers were sunk and many fishermen are missing.

Plan World Convention

Victoria, B.C.—A world convention of fire chiefs will be held in San Francisco next year on the fifth anniversary of the organization of the International Association of fire engineers. If plans of the Pacific Coast Association of Fire Chiefs, which met here, are carried out.

Winstanley—A reduction amounting to 20 per cent. on all rates over 50 cents per hundred pounds on livestock shipments from the prairie provinces to St. Paul and Chicago, has been announced by the Canadian Pacific Railway.

There is no reduction being made below 50 cents per hundred pounds. This new rate will become effective Oct. 2. The statement is issued by the Canadian Pacific Railway. In view of the fact that cattle are moving from the prairie provinces to St. Paul and Chicago, notwithstanding the Fordney tariff, it is reducing the rates on livestock in line with the reductions made by U.S. railways.

The following are quoted as examples of the new rates:

Moose Jaw to St. Paul 25 cents as against the present rate of 50 cents; Calgary 37 cents against 50; Calgary and Edmonton to St. Paul 70-12 against 85; to Chicago 52 as against 81.15.

Halifax To Improve Shipping Facilities

Board of Trade Looking For Large Cattle Shipments.

Halifax, N.S.—The Board of Trade here announced that they have taken steps toward the improvement of the harbor facilities at this port in anticipation of large annual shipments from Halifax to the Old Country during the coming winter.

The board may ask the Government to have the large sheds at the new terminal made ready for temporary use as a cattle pen, according to one suggestion. The first small shipment of cattle through Halifax has already been made.

Socialists Want True Republic

Aim At Thorough Elimination of Monarchy.

Berlin.—The Independent Socialist party introduced in the Reichstag a bill stating at the thorough elimination of all vestiges of monarchism Germany. The main clauses of the measure provide that all persons of former Emperor William and the former German Princess, both family and private, shall be connected by the State, civil and military functions, holding monarchist views or tolerating monarchist manifestations, or who have made known their intention to be dismissed without pension, and military men shall not be permitted to carry arms except by active service. The bill also proposes the introduction of trial by jury.

Reduce Price Of Farm Implements

Chicago Firm Makes Cut From 10 to 20 Per Cent.

Chicago.—The International Harvester Company announced reductions ranging from 10 to 20 per cent. in practically all lines of farm implements. The cut is effective Oct. 1.

This is the company's second general reduction this year. In March and April, prices of agricultural machines were cut 10 to 12 per cent. and in July reductions were made on all types of tractors.

"These prices were made after a careful study of the market and labor conditions," the Harvester Company's announcement says, "and represent our judgment as to the most possible raw material and production cost that can, under the most favorable conditions, be forecast for the manufacturing season of 1927."

French Policy Announced

Paris.—Premier Briand will outline the position of French government relative to the conference on limitation of armaments in a speech at St. Nazaire on Oct. 9. On that occasion he intends to make a declaration of ministerial policy concerning all questions of prime importance where the security of France will be affected before Parliament when it reconvenes on Oct. 15.

Appeals to League

Genova.—Dr. Fridtjof Nansen, of Norway, appearing before one of the committees of the League of Nations here today, urged the league appeal to the various countries to help feed Russia, succeeded in getting that body to hold the question over for further consideration in the face of the submarine's adverse report.

The Bow Island and Burdett Reviews heartily endorse and urgently commend to the sympathetic attention of all their readers the following items sent from the Forestry Branch, Department of the Interior, Canada.
Some of the items will appear each week.

FORESTRY LETTER
"Spare O Spare
The Trees"Growing Trees for fuel
and Lumber

The question of economic tree culture on the prairies has not yet received sufficient attention to furnish enough absolutely reliable data, upon which to base conclusions. There seems to be little doubt, however, that tree-planting would pay in many cases. There are on almost any farm certain portions of land which are not utilized for grain growing, and which if returned, do not really give the returns they should do. Low spots difficult to drain, rough stony places, steep banks of coulees, and other places cut off from the large fields by water-holes or creeks, are left idle, as they are to make it profitable to cultivate them. These are instances of conditions where tree planting might be the means of converting land, at present worthless and idle, into valuable and revenue producing property. Norman M. Ross, Dominion Forestry Nursery Station, Indian Head, Sask.,

Rapid Tree Growth in
Southern Ontario

At the meeting of the Council of Norfolk county, Ontario at which it was decided to purchase a block of 500 acres for reforestation, one of the councillors gave an instance of a 25 acre lot in North Walsingham, townships owned by a man who lives five miles away. Seven years ago it was a sand plain, decorated only with dry stumps of a primitive pine forest. Today it is entirely reforested in growths ranging from fourteen feet downward. It was first fenced and each year a portion was planted to pine. The planting was done by plowing a furrow straight as might be and planting the seedlings along the furrow. The entire plot is thriving, and the first year's planting is now beginning to undergo natural thinning out.

Abandon Chautauqua
Blackie, Next Year

BLAQUIE, Sept. 30 - A Chautauqua committee meeting was held in the municipal office on Tuesday evening for the purpose of voting for organization of a Chautauqua for 1922. Owing to poor crops and general hard times the majority were not in favor of guaranteeing a Chautauqua for next year. As the principal guaranteeing them any sum of money is entirely wrong.

SUGAR DOWN AGAIN

VANCOUVER, Sept. 29 - A reduction in the price of sugar of 20 cents a hundred pounds, bringing it down to \$8.00 per hundred pounds, is announced by the British Columbia Sugar Refining company.

NOTICE TO CREDITORS
and CLAIMANTS

NOTICE is hereby given that all persons having claims on the estate of the said Anselme Gelbrech who died on or about the 18th day of August A.D. 1920 are required to file with Messrs. Prowse & Lyons of Bow Island Alberta solicitors for Pauline Gelbrech the Executrix by the 31st day of November A.D. 1921 a full statement duly verified of their claims and of any securities held by them, and that after that date the executrix will proceed to distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been filed or which have been brought to her knowledge.

Dated this 21st day of September, A.D. 1921.
Prowse & Lyons
of Bow Island, Alberta.
Solicitors for the Executrix.

Bow Island

On Thursday last the members of The Ladies' Aid of the Anglican Church, met at the home of Mrs. T.H. Blaine, a very good meeting was held and many plans discussed, the hostess served a very delicious lunch which was greatly enjoyed by all. The next meeting will be held at the home of Mrs. Duffy, on Thursday 18th.

Mr. Brink Gage, living about eight miles south of Bow Island, met with a painful accident last Friday afternoon, it appears that Mr. Gage had been having some trouble with his tractor and while making it, it backed and threw him against the wheel, he was then rushed to town and on examination Dr. Cairns found that several ribs were broken.

NOTICE

U.F.A. and U.F.W.A.
Pres. L.D. James, Pres. Mrs. L.D. James, Sec. G. Monds. See Mrs. G. Calder.

Will meet on Saturday
October 8th.

Burdett

We regret to announce the death this week from Pneumonia, of Mr. William Donaldson, Senior, one of Burdett's respected and esteemed farmers.

The late Mr. Donaldson was a Mason and lived a long, useful and hard working life, he was 70 years old, when dying, he said "he was quite prepared to meet his God," how many of us can say that with the sublime Faith of this Mr. Donaldson? The funeral took place last Tuesday 4th, October - many Masons attended and a crowd gathered at the graveside to pay their last respects.

The Ladies of the L.D.S. Church will give a real Halloween Party in Sandy's Hall, Oct. 31st. Watch for further notice.

Relief S. Conference will be held in L.D.S. Church, Sunday October 9th, 1921, visitors are expected from Raymond good program will be furnished.

VIVE LA FRANCE

Old France in Canada

A Made-in-France exhibition train is now touring Canada, over the Canadian Pacific Railway. It was opened at the C.P.R. Place Viger Station, Montreal, on August 29th, amongst those present being Premier Arthur Meighen, Mayor Martin of Montreal, and Senator C. P. Beauchamp, who organized the bringing of the French exhibition goods to Canada and the tour of the train throughout the Dominion. The object of the train carrying French goods is to promote cordial, social and commercial relations, reciprocally advantageous to both countries. The train consists of a baggage car, eight exhibition cars, a tourist, a diner, and two sleeping cars. The eight coaches of the train carry large quantities of:

- (1) The intellectual development of France;
 - (2) Industries, commerce and tourism;
 - (3) French styles;
 - (4) Leather industries;
 - (5) Chemical goods, perfumery;
 - (6) Instruments of various kinds, food;
 - (7) Agriculture, horticulture, and forestry;
 - (8) Jewellery, objects of art, clocks, watches.
- But this list only gives an idea of the hundreds of things on exhibition. In a tour of the Dominion the train will travel a total of 7,000 miles.

WINNIFRED

Mrs. Thelma Long is spending a few days visiting her grandparents. Mr. and Mrs. Theo. LeJean returning to her school on Monday at Medicine Hat.

Mr. Jack Ross left Monday to visit during the winter months at his home in Prince Edward Island, expecting to return to Winnifred next spring.

Mrs. Elsie Westkamp of Milwaukee, Wisconsin has been employed at the home of Mr. D. Annon.

Mr. Roy McLean came down from McLeod to look after his farm and crop interests last week.

Mr. Geo. Wollman left Saturday Oct. 1st to look up a new location near Macleod, Alta.

The young folks gave another popular dance on Saturday night Oct. 1st at the home of Mrs. O. Fisher, Oliver Durand, and Halton Fisher conducted the affair, refreshments were served at midnight.

Mr. and Mrs. H. Davis and Mr. Geo. Fredrickson motored to Milk River this week.

Mr. Ernest Hick is busy this day clearing about 400 acres, the farmers certainly appreciate Mr. Hick as their tanker.

Tommy Dunn and his hounds were out hunting Tuesday and after a few hours seeking returned with three coyotes.

Mr. H. T. Lathier made a business trip to Medicine Hat Tuesday, and while there visited the French Train and reported it was magnificent all through.

Mrs. Thelma Stevens returned from Pennant, Sask. and will spend a short time with her parents.

Mr. J.A. Lathier, representing the Cockhatch Pile Co. was in Winnifred a couple of days last week.

Mrs. H. Davis spent Tuesday in Lethbridge visiting friends.

Mr. Oliver Durand entertained at a chicken dinner Oct. 4th, the following guests were present: Geo. Fredrickson, Earl Smith, H. Davis and Harry Winch, the dinner being in honor of Mr. Fredrickson's birthday.

Billy McLean and Tommy Dunn returned from New Dayton, Saturday. Julius Leininger is having this week for Sask. In search of work.

(1) "Made in France" Train at Place Viger Station.
(2) The car illustrating "The Intellectual Development of France," put up by the "Ministère des Beaux Arts" of France, in which the public can see some fine paintings and pieces of sculpture.
During the four days which the train remained in Montreal it was visited by thousands of interested persons. It was a huge success at the Toronto Fair and is attracting as many numbers everywhere it goes through the country.
A number of the staff of the Canadian Government commercial intelligence service is travelling with the train, partly in order to study the results obtained from a business point of view. The information obtained is to be used in fixing up the trainload of Canadian products to go to France and probably then on to other parts of Europe and the United Kingdom and other European countries.

Population of Two In Lonely Outpost At Findlay Forks

From what is probably one of the loneliest outposts of the Northern Trading Company, Angus there is a government telegraph station and a post of the H.B.C. The Laneson-Hubbard Company also operated a post at this place, but closed it up during the past year.

Mr. Sherwood, in addition to his duties in connection with the Indian fur trade, is mining recorder, postmaster and any other office necessary to the transaction of business in the particular section of the mountains where his post is located. He is the only permanent white resident in the pass with the exception of his wife, who is also pioneering in the wilderness—a wilderness which without doubt will before very long bear the marks of the railway. The Peace Pass is the logical "gate" for the coastal railway.

Going to Edmonton, the trader travelled out from his post via the Glenora portage and Prince George, and then by the railway. Leaving Findlay Forks, the Peace River was taken for 106 miles, next came 17 miles on the Peace River, and then 55 miles on a chain of lakes and waterways known collectively as the Crooked River, which leads to Summit Lake on the height of land at the Glenora portage. From this point, the Peace River is a well made road constructed by the British Columbia Government for a distance of 25 miles, connecting the portage with the island town.

From Prince George to Findlay Forks, the journey is made by the stream and occupies 6 days, while the return trip taking 9 days, while about 11 or 12 are consumed in the voyage from the C.N.R. to Findlay Forks to Peace River settlement.

The post buildings of the Northern Trading Company at Findlay Forks are the only sign of civilization at the present time, but during the summer there are numbers of independent miners at work on the high hills of the mountain rivers, washing gold. The majority of these, however, go "out" to the winter, some remaining in the district to trap furs.

This year there were about 30 prospectors at work. In addition to the men of the mining companies who were engaged in mining operations with machinery, and consequently work in large scale.

There is placer gold and alluvium to be had, states Mr. Sherwood, and even using the crude methods of the average prospector, the experienced men were able to make wages, but it is a country in which a gremlin can readily starve to death. About 20 Indians live in the vicinity of the Forks, these natives being of the Skeena nation, and not very different type of aboriginals from the entirely of a straight diet of meat and fish, and during the season kill large quantities of deer.

With the natives come in to trade their furs it is the usual custom to purchase furs, beans and other necessities of the white man. This is accomplished, they make cash and remain at the post until all the strange articles are consumed, after which they once more take to the hunting trails, and the fish and meat diet.

The climate on the whole is milder than that of the Edmonton district, due to the fact that the Forks is in the Chinook belt. The deepest snow which Mr. Sherwood remembers is thirty inches and the coldest thirty-one degrees below zero.

A garden is kept at the post, and in addition to the usual hardy northern vegetables, cucumbers, green corn and other things are raised. But it is rarely that they ripen. Usually seven or eight head of peaches belonging to the present are wintered, and the berries and nuts have been grown successfully on the river flats, to feed them.

There is considerable game in the vicinity of the Forks, moose in particular forming the principal diet of the Indians. Each Indian kills on an average of 4 moose a year, and in addition to caribou and other game. In the mountains caribou are plentiful as well as moose.

While bear are to be found in considerable numbers at certain seasons, the trader during two days travelled counted 13 bears feeding on the hills. Coming down the Peace on one occasion, "Gritties" are sometimes met, but with that exception the killing season does not give any life.

About October 15th the hills are partially frozen and are not so good for travel, springing ending about the end of March or the beginning of April. But six mails per year are received at the Forks, the last being sent in the summer by pack pony and canoe from Grande Prairie and Hudson's Hope, and one at Christmas and

Beef Rings Are Well Established

Reports of Activities in Saskatchewan Contain Valuable Points.

A short time ago a circular letter was sent out from the Co-operation and Majors branch to the secretaries of beef rings in Saskatchewan, asking them to be good enough to furnish a statement of their activities. These beef rings are fairly well established in this province, but some of the reports are rather surprising, while others contain valuable points. One secretary cannot suggest any thing in the method, and in this ring during the hot weather only two-year-olds are killed. Another points out that success or failure depends almost entirely on the choice of a butcher. "A man too timid," says this secretary, "to select an unfit animal is useless, and to select the duty is a committee would be to make the working of the ring too cumbersome."

The Peace Pass is well stated, the Peace River is no hindrance to railway construction through this break in the mountains, and the time should be lost in waiting for the Peace River to be in closer touch with civilization.

Need Government That Is Strong Enough to Govern.

It is frankly disappointing that the Republican Administration in China failed to achieve a greater measure of success in bringing into actual fact the hopes so freely displayed upon its inauguration. Successive governments have proved weak and incompetent, but puppets in the hands of reactionary military factions. The country is in the grip of perpetual political unrest and by excessive military expenditure keep the civil administration starved and the country on the verge of bankruptcy.

The main problem for China is to get a government that will govern, and which will not be the victim of political and social chaos. In a very important sense it is true that "the real difficulty is financial," but this difficulty would largely disappear if only our government strong enough to rid the country of the existing system.—Hong Kong Times.

China's Problem

Workers' Compensation Board Receives 4,853 Reports.

Four thousand eight hundred and fifty-three accidents, major and minor, throughout the Industries of the Province of Alberta, have so far been reported to the Workers' Compensation Board. Last year there were 5,409 altogether reported to the board. New operators are coming under the act all the time, and there are now 3,300 employers on the list of the board.

Of the accidents, 2,124 were in the coal mines and 2,729 in the other industries. Of the fatal accidents, 25 were in the coal mines and 22 in other industries.

Girls Walk Across Continent.

Walking from New York, according to the story of Miss May Fink, a girl from San Francisco and Esther Roman, reached San Francisco and the trip, which they said was "for adventure," occupied four months, and cost them about \$100 each.

Quaint Japanese Laws

Many Were Abolished By Father Of Present Milads.

It almost impossible for the western mind to grasp the vastness of the changes wrought in Japan during the past sixty years. Before the present Milads' father abolished the twenty laws, for instance, no Japanese could eat a meal, ride in a conveyance or wear a garment without considering whether the law might be offended. Whatever a man's rank, he might not have more than two kinds of soap and six other duties at his meals, and minute regulations were enforced as to the quantity of sake allowed at an official banquet, the number of cups being served according to the drinker's rank. A nobleman, even of the highest rank was not permitted to spend more than \$2 on dress for his wife.

Professor Cameron Gives Interesting Suggestions On Insect Control Problem

Shackleton's Aviator Will Use Biplane

Is One of Only Three That Were Ever Built.

Major C. R. Carr, an English soldier of fortune, the aviator of the Shackleton expedition, plans to fly above the Antarctic fogs to scout out passages between the fogs through which the quest may pass. He is also the photographer and naturalist of the expedition. The biplane has been used in one of only three that were ever built. The other two were flown respectively by Col. Brien, V.C., the pioneer flyer from England to Montevideo, and by Sir Ross Smith, the first man to fly from England to Australia.

The perished fogs that will be explored are found by Shackleton on the island of Trinidad at a certain point where he landed from Captain Robert F. Scott's ship, the Discovery, more than 12 years ago. Though the island is eight miles long and 4,000 feet high, and in 1841, when visited for the first time, it was covered by glaciers of the Bruce expedition, was found to have at least four biplane landings. One of the biplanes, "Tasman," the "lost" biplane, has been mentioned in old nautical records, but apparently has disappeared. A spot in the Pacific is supposed to be where it will be dredged for evidence to show that it is recently submerged land.

New Pest Called "Devil's Burr"

Lies So Close to Ground Is Almost Invisible.

The Devil's Burr made its appearance in California, Arizona and Texas, and even in such Middle West States as Illinois, Indiana and Iowa. The weed is a vine that lies on the ground in such a manner that one of the sharp long spines always points upward ready for the first bird that comes along.

In some California counties it has become so common that at least half of all bicycle tire punctures are caused by the weed. The trouble is caused by this pest, which by reason of its color, and because it lies so close to the road, is almost indistinguishable even in broad daylight. Besides the sharp spines, this weed produces spiny seeds which attach themselves to the tire being carried long distances, even revolution the wheel makes tending to move the sharp points further into the tire.

Farmers on our western prairies and the officers of the Provincial Department of Agriculture should be on the look out for the pest, and give it the best reception it is capable of.

The Development of Entomology

In Saskatchewan was the subject of a paper by A. S. Cameron, Professor of Zoology, University of Saskatchewan, at the Agricultural Conference at Saskatoon.

"It was not until 1917," says Professor Cameron, "that the Federal Entomological Branch designated one of its officers to visit provinces, and owing to the entomological problems that arose at this time an agreement was made between the University authorities and the Federal Department of Agriculture that the Entomological Branch should have a permanent representative in the province to be associated with the university."

Although not stated by the Federal Entomological Branch, it was intended that that representative should devote his time principally to research work in any entomological problem that required investigation from time to time, but in addition to this he had to undertake a large amount of extension work, by correspondence with the farmers and stock raisers in the infested areas, and being unable to do this practically impossible for him to keep up the work of the branch, which might take place in outlying districts.

The grasshopper plague was the reason for the interest in entomology as a subject for serious study, and not as a minor subject, the other branches of agriculture. The problems of the entomologist are not confined to the province of entomology, but extend to the main of veterinary and medical entomology there are urgent demands for scientists equipped with the necessary knowledge to be responsible for the control of insects that are detrimental to stock and human welfare.

It does surprise the speaker that the grasshopper plague that the Provincial Department of Agriculture could not find in the Province a trained field assistant to entomology. Although it is a pity that it could be plainly shown that there is no one in the province of entomological teaching, the University will submit the question to its sympathetic consideration because this lack of trained entomologists is a problem that not only affects Saskatchewan but affects the country at large.

In addition to the practical subjects the trained entomologist must have more than a speaking acquaintance with the natural sciences, as well as the related sciences of physics and chemistry.

The problems of insect control are related to the various branches of agriculture, including fruit growing, forestry, public health and other human occupations. Agriculture should be the look out for the pest, and give it the best reception it is capable of.

World Happenings Briefly Told

Sold Legation in the Villa Savoye, towered above its own world's-airplane record by flying at the rate of 320 kilometers, 210 meters (192 miles, 163 yards) per hour.

According to a report read to the Port Arthur City Council, five thousand men will be working there by the middle of winter. This report was sent to the minister of labor.

Average gross profits of over 300 per cent. have been made by armchair lunch counters in Boston. In some instances the profits have been found to run as high as 600 per cent.

Doctors Caperton, correspondent says that the Union of South Africa loan for five million pounds sterling for various public works has been procured.

Cool output from the Alberta mines up to the end of July this year was 2,750,585 tons, more than half a million tons less than last year for the same period, when the amount mined was 2,557,817 tons.

Because it had been given to her by a friend who was killed in the war, hold-up men at New York permitted a young woman to retain a wrist watch, after taking all her other valuables.

It is charged that immigration officials at Ellis Island are separating parents at Ellis Island from children. The parents being admitted and their children sent back, because they happened to arrive after the quota had been filled.

Sixteen years ago Mr. and Mrs. Schneider arrived in Garner, Ia., from Lisbon, N.J., 400 miles, taking a horse and rig after a day's trip. Recently they made the same trip in eight hours in an airplane with their son as pilot.

Robert Donald, well known journalist and for several years chairman of the Empire Press Union, has written a letter to the London newspaper, commenting on the absence of any scheme for constructing an imperial wireless telegraph chain. No better way of supplying useful and necessary labor for the unemployed can be found, he said, than through the erection of wireless.

Takes Electricity From Air

New Generator Consists of Wire, Iron and Minerals.

Demonstrations have been made on the streets of Deaver of a new electric generator that is claimed by the inventors to take electricity from the air.

The inventors are J. B. Ammann, of Deaver, and his brother, C. B. Ammann, of Spokane, Wash.

To demonstrate, the brothers recovered an old electric auto, took out the batteries and after roving their new "atmospheric generator" fast, they got in and rode off at a high speed.

"There is nothing inside the drum that moves; the contents consist only of iron, wire and minerals," says C. B. Ammann.

"It can be used to drive any electrical apparatus and can be made in any size."

The brothers are closely guarding their secret, and even take their "inventions" when it is not in use, to their room in the Argonaut Hotel. So far the brothers have not offered to sell their proposition.

Electrical men in Deaver are waiting "to be shown," but they grant the thing works.

MUCH ILL-HEALTH DUE TO BAD BLOOD

If the Blood is Kept Rich and Red You Will Enjoy Health.

More disturbance to health is caused by weak, watery blood than most. Blood is the life of the body. If the blood is impoverished, the nerves suffer from lack of nourishment and may be troubled with rheumatism, neuritis, neuralgia or sciatica. Muscles, nerves and organs begin to show symptoms of any of these disorders by failing to perform their duty. Dr. Williams' Pink Pills for Pale People. These pills have been found to be the best blood purifier and it becomes enriched with health impulses. The value of Dr. Williams' Pink Pills in cases of this kind is proved by the experience of Mr. D. J. Williams, of New River Bridge, N.Y., who says: "For some years I suffered severely with headaches, pains in the back and a run-down condition. At times the pain in my back would be so bad that I would sit up in bed all night. From time to time doctors were called in, but did not give me more than temporary relief. And then one day when I was suffering terribly a neighbor came to see me, and urged me to try Dr. Williams' Pink Pills. After taking two boxes I felt relief. I got five boxes more and before long I was all right. I feel as if I were a new man. I am now working as a hawker in a ship, and in ten hours a day and making more money than I ever did before. I am now working as a hawker in a ship, and in ten hours a day and making more money than I ever did before. I am now working as a hawker in a ship, and in ten hours a day and making more money than I ever did before."

Health First POSTUM

"There's a Reason"

This is the start of a better day

There's satisfying comfort and cheer in a breakfast cup of Postum, and there's no disturbing element to irritate nerves or digestion and leave mental energy lagging before the day is done.

Thousands of former tea and coffee users have found that Postum meets every demand for a delicious table beverage, and brings steadier nerves, clearer mind—better health.

As many cups as you like with any meal—no after-regrets.

Postum comes in two forms. Instant Postum (in tin) made instantly in the cup by the addition of boiling water. Postum Cereal (in package of large bowls, for those who prefer to use the dish while the meal is being prepared) made by boiling for 30 minutes.

"There's a Reason" for Postum

Preparing For Winter

BY LORIE T. C. LYNCH
 An Acknowledged Expert in All Matters Pertaining to Household Management.

Too often winter approaches only to find the home maker totally unprepared for it. Unfortunately, therefore, there is very often much unnecessary distress as well as expense during the cold season. The thrifty housewife goes over her home thoroughly during the fall days, and makes a note of needed repairs or alterations. So, whether you own the house in which you live or rent it, you should take stock of the condition. For instance, is the heating plant in working order?

Where it is possible, the coal supply should be secured on far in advance of actual winter as possible. It is best forthright to make a fire in the early fall just to test out the equipment.

Then there is the matter of weather stripping and double windowing. The really cold climate. Experts tell us that there is a great saving in fuel where these appliances are used. The handy man of the house can easily measure for and apply weather stripping. It takes, however, a professional to make really effective double windows.

It is the part of wisdom to have the roof of the house gone over very thoroughly for leaks. Gutters and downspouts should likewise be gone over.

When taking down the hangings and curtains of summer they should be cleaned, aired, wrapped and labeled so as to be available at a moment's notice when the warm days return. Summer clothing should be gone over, and only what is really wearable for further use should be granted storage space. There are many poor folks in the warm parts of our country who might be able to make immediate use of summer attire you no longer want.

Porch furniture should be cleaned and wrapped either in newspaper or burlap. If it needs repainting, fall is a good time to paint it. A stiff brush and some soapy water to which has been added a little ammonia will prove effective in cleaning red or white furniture.

Care must be taken not to store porch pillows as they are taken from the porch. The covers should be removed, carefully laundered, wrapped and labeled. The pillows themselves may be washed by washing out in hot soap suds under the jet and then thoroughly squeezed. The pillows should be well rinsed and hung on the line to thoroughly dry. Winter covers may be put on these pillows.

The thoughtful housewife will see to it that every member of the household is provided with rubber shoes and rain-coats coats far in advance of the cold rainy days. It is well to print names and address in indelible ink on the lining of the school child's rubbers. Go over the umbrellas and see that they are in usable condition. These suggestions will help make the household run more smoothly during the cold days to come.

Elements of Peace.

England seems to have decided that it doesn't want to whip Ireland, and Ireland appears to have determined that it can't whip England, so that doesn't mean peace there is no hope.—Toledo Blade.

W. N. U. 1588

By Marie Belmont

The tendencies in dress are often reflected in other realms of apparel. The nightgown illustrated is fashioned from a rich quality of fleecelined crepe de chine. It repeats the stylish tendency of the frock in the ailes that are tied at its side. These are made of double faced ribbons which show pale blue on one side and flesh on the other. The square cut decollete is outlined with fine val lace and insertion and partly hidden under the fine mesh of the lace appears the narrow ribbon which is tied in a dainty bow in the centre front.

New Lamp Burns 94% Air

Beats Electric Or Gas.

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 100 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 24¢ air and 6¢ oil per hour (kerosene coal-oil). The inventor, T. V. Johnson, 520 McMenster Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write today for full particulars. Also ask him to explain how you can get the agency, and without experience make money, make \$200 to \$500 per month.

Back To The Land

Who Needed Acres Waiting For Men

How we dug into the land, each man in his own back yard, during the days of the war when the demand waited for the Allied world, straining in combat with the enemies, would have strangled civilization. And after this experience it is the more strange that we have not, as a nation, in these days of reconstruction, discovered what the land holds out to us, a quick return to normalcy. Just now there are thousands of men who need retraining employment. There are thousands of acres of undeveloped lands. The one needs the other as much as capital needs labor and labor needs capital.—Seattle Times.

Minard's Liniment used by Physicians

Homestead Entries Increase. Homestead entries in Saskatchewan district for the month of August total, as against 12 for the same month last year. Land sales revenues increased from \$112 to \$176.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence, even the slightest nervous agitation, the loss of sleep and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. D. Kellough's Asthma Liniment has proved its merit through years of service. A trial will surely convince you.

The first woman to be presented with the Freedom of the City of London was the Baroness Burdett-Coutts, in 1878.

A deputy game warden of Centreville, Md., arrested his 14-year-old son for shooting a raccoon in violation of the game law.

One of the mysteries connected with sunspots is their appearance in larger numbers than usual every eleven years or so.

Ask for Minard's and take no other

Boril prevents that sinking feeling

Planting Sockeye Eggs

Will Aid in Restoring Run of Fraser River.

Planting sockeye eggs, much as one plants potatoes or any other seed, is one of the new methods in use in connection with the artificial propagation of the king of salmon. The eggs are planted under gravel. This is akin to the conditions under which "fish are hatched by natural means and is expected to yield better results than were possible before. It is anticipated that this method will greatly aid in restoring the sockeye run of the Fraser River to a sound basis.

Boot Factory For Calgary

Financed by British Interests Would Employ Over 300 Men.

If the City Council approves of the initiative often made by the commissionaires, Calgary will have a boot factory in a short time, employing more than 300 men. The concern which may go there is financed by British interests and the city commissionaires have recommended that a 99-year lease, on any terms, be granted.

Only the uniformed endure the agony of corns. The knowing use supply Holloway's Corn Remover and get relief.

Quick Work On Imperial Cable

Speech Sent From Vancouver to London in 45 Minutes.

A telegraphic achievement was recently performed at Vancouver when Lord Northcliffe's speech before the Canadian Club, was cabled to the London Times through the Imperial Cable in the remarkable short time of 45 minutes. The meeting of the Canadian Club in Vancouver was held at 1 o'clock in the afternoon—that is, 9 o'clock London time. A start was made with telegraphing the message at 2 o'clock (10 o'clock London time), and the full dispatch was received in London at 10.45 (2.45 in Vancouver).

Corns, Warts, Bunions Painlessly Removed

Don't flap any longer, don't suffer another hour from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putnam's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute, 25c everywhere.

Otherwise, Not "I see by the paper that a woman can live on nine cents a day." "Nine cents when it's her own money, they mean."—New York Sun

The Perils of Neglect

Digestive ailments are frequently neglected. People say "It's only a touch of indigestion—it will go away." What begins as simple discomfort is allowed to become a serious—chronic ailment. Never neglect the treatment of digestive derangement. To relieve disorders of stomach, liver, kidneys and bowels, Beecham's Pills act promptly and usually overcome the difficulty. Take

There will be Sunday School at 3 p.m. Children of all ages are invited to attend. Come and help swell the attendance.

Mrs. W. S. Henry was a business visitor to town on Wednesday last

Farmers. Need New Leaders at Edmonton

Present Leaders making Enemies in All Directions

The Review has consistently advocated "That the Farmers should co-operate with Labor and so both parties would win all along the line"

But no, the Farmers present leaders Premier Greenfield and President Wood of the U.F.A. most emphatically say "No, we will have no friends outside, it must be only U.F.A. principles allowed"

This shows the poor intellects of these two men Greenfield and Woods, because parties that would be Friends to the Farmers, are turned into Deadly Enemies owing to the narrow, short-sighted and poor mentality of Greenfield and Woods, who instead of working in harmony with other Parties and so make the "Farmers Political Party" that much stronger, are instead helping to wreck the "Farmers Party" by the selfish idea that not one is to share with them in the Honor and Responsibility of Government.

All other parties wherever they may be, must how down and play second fiddle to a U.F.A. Government according to Greenfield and Woods

That should not be, every Party should be given an opportunity to enter the Government without incurring the silly wrath of Greenfield and Wood

Therefore Farmers if you wish to be a permanent political Party "either in Alberta or the Dominion of Canada you must quickly look around for "Keener, Better and less Narrow minded Intellectuals" than Greenfield and Woods

You must have someone whose Intellect is massive enough to be able to wield Power and "Think in a Broad way" when they attempt to govern these vast stretches of Alberta and the still vaster stretches of this our Far Dominion of Canada

In our Rules, we will "Not be Satisfied" till we get the "very Best in all Canada"

Greenfield and Woods have made Enemies all around in a very short time and as time progresses they are bound to make hosts more, by their autocratic bearing

They offended the Lethbridge Board of Trade, for want of a little common civility

They offended the Labour Party at Macleod by wanting the Labour Party to play second fiddle to them

They offended the Labour Party at Lethbridge on the same grounds as at Macleod

They offended the Raymond U.F.A. Local (and all lovers of Fair Play) by the action of George Roadley in Arbitrarily Dismissing A. Palmer B.Sc. because he was appointed by the late Liberal Government

If they keep on like this, they will make the word "Equity" a Jibe and a laughing stock among men

They offended Dr. Michael of Red Deer, "a real brainy man, owing to their narrow mindedness" Dr. Clark was right on their side until just lately, now he would like to sweep such as them off the map

Joshua Fletcher the former President of the U.F.A. resigned this week from the Grand Prairie Farmers Association, as a "Protest" against the "One man power" principle introduced into U.F.A. affairs by H.W. Wood, which he says will lead to "Destruction"

No man, no family, no Town, no Country in the World, "lives for him self or itself alone" and we have tried to do so in the past, then History

tells us that they met with Terrible Defeat and Ignominy

We pray that may not be the fate of the People of Alberta while under the Temporary Rule of Greenfield and Woods

Win will you pick on for the New Leaders at Edmonton?

If You want the Farmers to remain a permanent Political Party, You must act quickly

Bow Island

Mr. George Lomas owner of the Burdett Meat Market intends to take over Mr. Thompson's Meat Market in Bow Island and will open for Business next Monday October 10th, with a splendid array of all kinds of Choice Fresh Meats, also Barbecues, Lamb and Fish in Season

Mr. Lomas intends to keep open the Burdett Meat Market and will have a Fine Assortment of Meats there and will employ an Up-to-date Meat Cutter who will also be a First Class Sausage Maker and he will be in charge of the Burdett Meat Market, so the Public will be assured that the First Class Service which they have had in the past, will be continued

Mr. Lomas needs no introduction to the people of Bow Island where he is as well and favourably known, having been for years in the Meat Markets here

We hope that Mr. Lomas may achieve Success in this new addition to his business which he thoroughly deserves, for his Confidence in this Country and Courage to branch out.

Countries and Empires are only made by men of Action, combined with intense Loyalty to their Town and to their Fellow Man

Mrs. Leary and daughter Irene left on Tuesday to visit with her daughters Mrs. Davis and Mrs. Bailey at Vancouver

Mrs. Henry Hanson and family left for Banff last Saturday where they will spend the winter, they may later move to Vancouver, Mr. Hanson will leave in about two months to join his family

Mrs. A. Hoaglin and two of her sons have been on the sick list during the past week, but are now able to be around again
